Important information

* The selected feature is a removable accessory that will be installed post-registration by your chosen retail partner and is not considered in the CO₂ calculation of the vehicle.

§ All models have been tested in accordance with the NEDC and as such all L/100km and CO₂ figures quoted are full NEDC figures. NEDC figures may be adjusted according to the final specification of your vehicle.

The CO₂ emission (Diesel – 247 g/km, Petrol – 300 g/km) and fuel consumption (Diesel – 9.3 l/100km, Petrol – 12.8 l/100km) figures quoted by INEOS are Combined Cycle estimates. The low figure from a base vehicle with no options. Passenger vehicles are tested with 15% of payload. Commercial vehicles are tested with 28% of payload (Bodystyle and powertrain availability may vary by market). These figures may not reflect real world driving conditions, which will depend upon a number of factors including variations in weather, driving styles, vehicle load and accessories fitted (post-registration).

Final CO₂ emissions figures and resulting associated pricing will be confirmed by INEOS Automotive or your selected Retail Partner prior to order confirmation. Tests will be performed in accordance with legislation in force at the time of type approval.

Written and visual depictions (including photographs) of the vehicle are for illustrative purposes only and should not be relied upon. The information, specification and colours may vary from market to market and are subject to change without notice.
